Steven Oderayi

Engineering @ INFITX Africa
Nigeria

Summary

Core contributor to Mojaloop (since 2019), the world's first open-source real-time payment interoperability platform, backed by the Gates Foundation, Google, and Ripple, and a key engineer on the COMESA Digital Retail Payments Platform (DRPP), enabling cross-border payments in local currencies across 21 African nations.A systems thinker and proven engineering leader, I have led the digitization of entire banking institutions, architected enterprise platforms from the ground up, and guided high-performing teams to deliver reliable, secure, and scalable software. I bring a rare combination of deep technical breadth, spanning cloud-native infrastructure, microservices, CI/CD automation, and observability, with a sustained commitment to open-source quality and mentorship.Core skills: Linux, Kubernetes, Cloud Infrastructure, CI/CD, Distributed Systems, Security-Focused Engineering, Node.js, TypeScript/JavaScript, Python, Go, C#.www.github.com/oderayi

Experience

INFITX Africa

Senior Software Engineer
August 2023 - Present (3 years 3 months)
Mauritius

Working on a Mojaloop implementation of DRPP for COMESA. DRPP is the Digital Retail Payments Platform of the Common Market for Eastern and Southern Africa. Launched in October 2025, this platform is a cross-border instant payment rail that enables simple, affordable, and secure payments in local currencies across all 21 member states, with messaging built on the ISO 20022 standard to ensure interoperability and structured data exchange across diverse financial systems. The DRPP aims to cut costs, promote regional economic independence, and make regional trade more accessible, especially for small and medium-sized enterprises (SMEs), women, and youth.

i6 Group

Senior Node.js Developer
February 2022 - January 2023 (1 year)
Farnborough, England, United Kingdom

i6 is an aviation technology company that provide cutting-edge solutions for the Aviation industry. I worked with multiple product teams to design and implement SaaS platforms that run Airports and Airline operations.

PortX
Senior Software Engineer
July 2019 - February 2022 (2 years 8 months)
Mercer Island, Washington, United States

Worked as a Core Contributor on Mojaloop, the world's first open source platform for interoperability in real-time payment networks. Mojaloop is driving low-cost digital payment services for banks, companies, central banks, governments, and people everywhere. Mojaloop is backed by the Bill & Melinda Gates Foundation, Coil, Google, ModusBox, Monetary Authority of Singapore, Ripple, and The Rockefeller Foundation.

Primera Microfinance Bank Limited
Lead Software Engineer
October 2018 - July 2019 (10 months)
Lagos State, Nigeria

My mandate at Primera was to lead the engineering team in the digitalization of business processes, development of new strategic digital products for customer acquisition and retention, breaking into new markets leveraging technology, integrate with top tier payment systems in Nigeria including Remita, Flutterwave, Interswitch, and commercial banks, integration with Core Banking System (T24) and development of indigenous Core Banking System.

AB Microfinance Bank Nigeria Limited
Team Lead, Software Engineering
August 2015 - August 2018 (3 years 1 month)
Lagos State, Nigeria

Headed the software engineering unit of the bank and lead the development of core digital solutions and services. Laid the foundation for commercial solutions for digitalization and automation.

Proxynet Communications Limited
Software Engineer
January 2014 - August 2015 (1 year 8 months)
Lagos State, Nigeria

Worked as part of an engineering team building flagship products and spearheaded the development of commercial solo projects.

Products developed:
- Proskool
- ProskoolMobile
- ProskoolOnline (frontend)
- Inventory Management System
- Human Resources Management System
- Reel (SmartTV / IPTV Content Streaming Solution) for Alliance Motors, Access Bank, FCMB, Fidelity Bank, Sterling Bank, Skye Bank, United Bank for Africa, Zenith Bank, GTB Nigeria, GTB Gambia, and Universal Merchant Bank, Ghana.

Technologies used:
- Javascript
- PHP / RockMVC
- Java
- Oracle

Education

Caleb University Lagos

Bachelor of Science, Computer Science · (January 2018 - December 2020)
